Jeff et al.,

I just spoke with Ken Taylor about the Pebble hydrology data. He was very cordial but stated that company policy is not to release raw data in an electronic, usable form.

FYI.... I just spoke to Rick. We are not sure if Pebble's offer to provide raw data is limited to providing that data in PDF form.

Ken is expecting your call Jim. He sent me the attached. I think you are going to need more information to make heads or tails out of it. Perhaps station locations are in the document.

Rick,

Attached is our surface water hydrology data 2004-2008 collected at the gauging stations. These data are average daily flows at each station. I have asked our hydrology consultant how many measurements per day the continuous stations take, but I have not received a response yet. I'll let you know when I do.
